About Me

I am an experienced UX architect with a background in both programming and traditional graphic design. I have a proven track record of developing beautiful, intuitive user interfaces for a broad range of product types. I am seeking a position at a company that has need for a motivated UI expert with unique vision and ability to connect with managers, graphic designers, and programmers.

Self Employed
Independent Contractor, 2001-2003
Developed custom web applications and marketing sites for a variety of clients, including a coupon shopper site, a software development company, a landscaping business, and others.

Cottonwood Creek Baptist Church
Lead Developer, 2003-2005
Designed, architected, and developed an in-house multi-departmental content management system for a church with over 10,000 members. Also handled all in-house marketing and web design.

Lober Systems LLC
Lead Designer, 2005-2006
Designed web, print, and brand pieces for a large variety of clients. Developed booth and all ancillary assets for a New York tradeshow, as well as innovative branding strategies for multiple companies.

Simple Rocket LLC
Founder, 2006-2007
Designed and developed interactive web applications for small-to-medium sized businesses, including medical companies and software development firms.

Building4 LLC
Cofounder, 2007-2008
Oversaw all front-end development and UI design for several interactive web applications, including a ticket sales application, a meal ordering system, and others.

Kalkomey Enterprises, Inc.
Senior Developer, 2008-2008
Designed and developed a sophisticated application to handle registration for training classes across multiple states.

FireScope, Inc.
Software Engineer, 2008-2010
Developed and implemented innovative UI for a variety of web, mobile, and desktop enterprise software platforms.

Amazon, Inc.
UI Designer, 2010-Present
Working as an external contractor providing UI concepts and consulting for web and mobile projects.
